

1-1/2" STAINLESS STEEL 304 HEX NIPPLE, THREADED

The 1-1/2" Stainless Steel 304 Hex Nipple is a precision-engineered pipe fitting designed to connect two female threaded pipes or fittings in a straight run. Made from high-quality Stainless Steel 304, it offers excellent corrosion resistance, durability, and strength for a wide range of industrial and commercial applications.

**CORROSION
RESISTANT**

**HIGH
STRENGTH**

**DURABLE &
LONG LASTING**

**HIGH TEMPERATURE
RESISTANCE**

**EASY TO
INSTALL**

**SUITABLE FOR
VARIOUS FLUIDS**

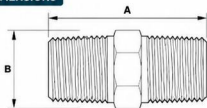

FEATURES

- Made from high-quality Stainless Steel 304
- Hexagonal center for easy wrench installation
- Male NPT threads on both ends
- Excellent corrosion and rust resistance
- High pressure and temperature tolerance
- Strong and durable for long service life
- Suitable for various industrial applications

APPLICATIONS

- Plumbing and Piping Systems
- Water Supply Systems
- Oil and Gas Industry
- Chemical and Petrochemical Industry
- HVAC Systems
- Food and Beverage Industry
- Marine Applications

DIMENSIONS

SPECIFICATIONS

Product Type	Hex Nipple
Size	1-1/2"
Material	Stainless Steel 304
Connection Type	Male NPT x Male NPT
Thread Type	NPT (National Pipe Thread)
Standard	ASME B1.20.1
Working Pressure	Up to 150 PSI (10 Bar)
Temperature Range	-20°C to 200°C
Hex Size	2-1/8" (Approx.)
Length	3-1/4" (Approx.)
Finish	Natural (Passivated)
Application	Water, Oil, Gas, Air, Steam, etc.
Country of Origin	Made in China

SIZE	A (LENGTH)		B (DIAMETER)	
	inches	mm	inches	mm
1-1/2"	3-1/4"	82.5	1-7/8"	47.8

Note: Dimensions are approximate and may vary slightly.
All dimensions are in inches (mm).
