

DUCTILE IRON GROOVED ELBOW 90°

UL/FM APPROVED

RED, MODEL: FIG 90

The FIG 90 ductile iron grooved elbow is designed for dependable directional change in fire protection and mechanical piping systems; its grooved-end design enables secure and efficient installation; the durable ductile iron construction provides reliable performance for UL/FM approved applications.

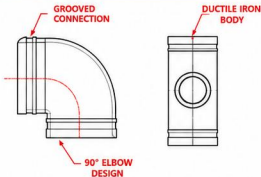

SPECIFICATIONS

Brand	PINOLEAKPES
Product	Grooved Elbow 90°
Model	FIG 90
Material	Ductile Iron
Type	90° Elbow
Connection	Grooved
Approval	UL/FM
Finish / Color	Red
Application	Fire Protection & Piping Systems

FEATURES & BENEFITS

-  90-degree directional change for grooved piping systems
-  Durable ductile iron construction
-  UL/FM approved for dependable service
-  Fast and efficient installation
-  Suitable for fire protection systems
-  Reliable sealing and structural performance

PRODUCT OVERVIEW

APPLICATIONS

-  Fire protection lines
-  Mechanical piping systems
-  Commercial and industrial facilities
-  Water distribution piping
