

DUCTILE IRON GROOVED WYE STRAINER

UL/FM APPROVED

RED

The ductile iron grooved wye strainer is designed to filter debris and protect downstream equipment in fire protection and mechanical piping systems. Its grooved connections ensure efficient installation, while the removable strainer cap allows for convenient inspection and maintenance.

1. SPECIFICATIONS

Product:	Grooved Wye Strainer
Material:	Ductile Iron
Type:	Wye Strainer
Connection:	Grooved Type
Approval:	UL/FM
Finish / Color:	Red
Application:	Fire Protection & Piping Systems

2. FEATURES & BENEFITS

-  Efficient debris filtration
-  Durable ductile iron construction
-  Grooved ends for quick installation
-  Removable cap for easier maintenance
-  Protects downstream valves and equipment
-  Suitable for fire protection systems

3. PRODUCT OVERVIEW

4. APPLICATIONS

-  Fire protection lines
-  Sprinkler systems
-  Mechanical piping systems
-  Commercial and industrial facilities

5. STANDARDS / COMPLIANCE
